MAGNUM PRODUCING, LP / R&R ROYALTY, LTD

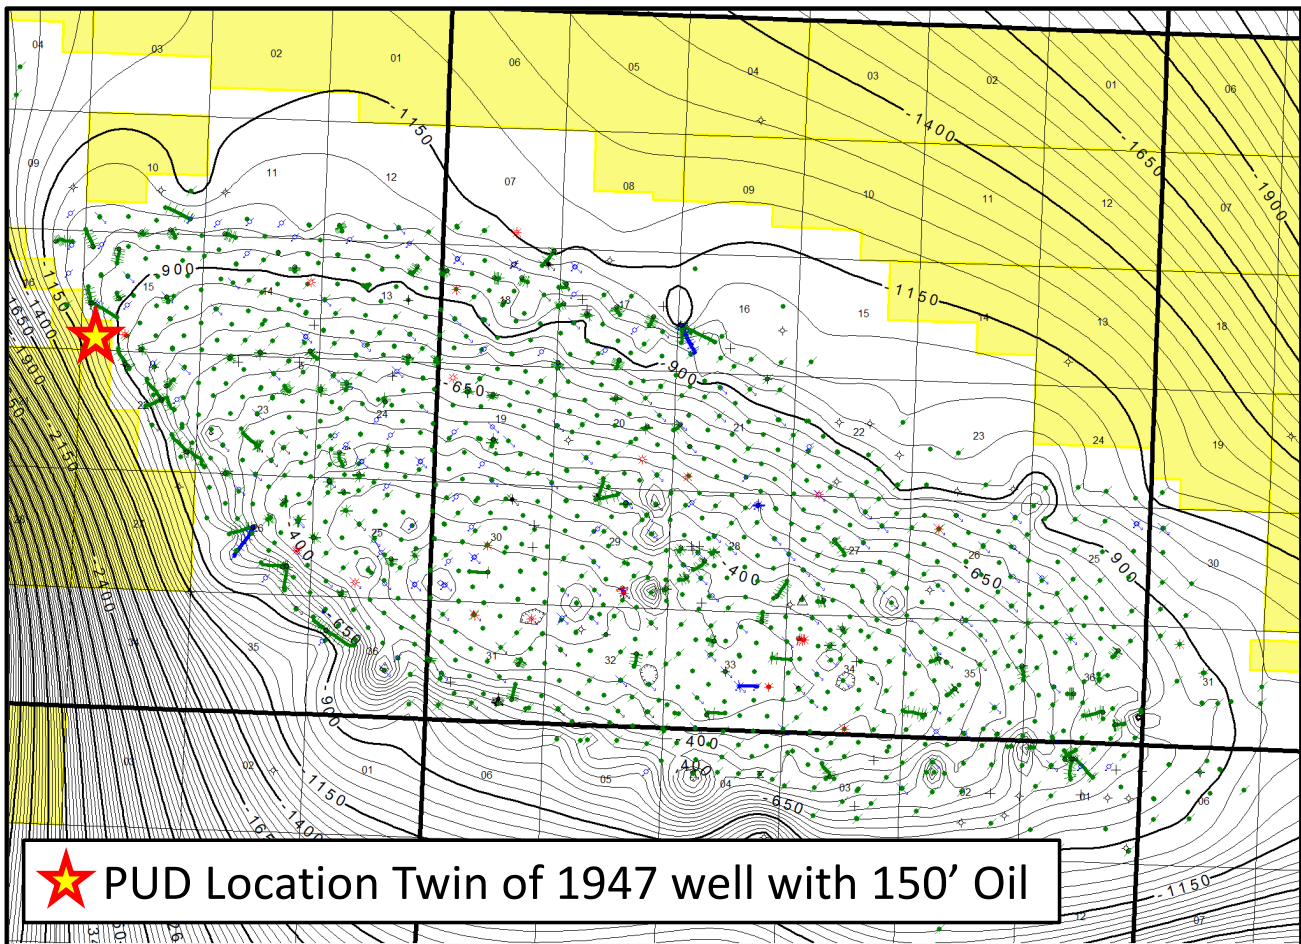

Weber Sand PUD – NW Colorado

Rio Blanco County Colorado

PUD Location Offsetting Rangely Rio Blanco, Colorado

Rangely field is the largest conventional field in Colorado with an anticipated EUR of over 1 Billion barrels. It is currently operated by Scout Energy Partners, recently acquired from Chevron. Magnum Producing LP has secured acreage adjacent to the field unit. Vintage well control shows a location on strike with 2009-2011 Chevron wells that have produced over 500MBO per well. The unique nature of the reservoir and CO2 flood, initiated in 1986, allows for infill and edge-of reservoir drilling to be highly productive at very low risk. Probable reserves: 500+ MBO per well
